React Developer/Front End Engineer

3+ years experienced React Developer with hands-on experience in identifying web-based user interactions along with designs and implementing high responsive user interface components by deploying React concepts. Proficient in translating designs and wireframe into high quality code, and writing application interface code via JavaScript and React workflows. Adept at monitoring and maintaining frontend performance and troubleshooting and debugging the same bolster overall performance.

EXPERIENCE

JUNE 2019 – TO APR 2020
REACT DEVELOPER, Codetron Technologies

- Identified web-based user interactions and developed high responsive user interface components via React concepts
- . Translated designs and wireframe into high-quality code and wrote application interface code via JavaScript following React.js workflows.
- Troubleshoot interface software and debugged application codes to improve functionality and performance by 50%
- Developed and implemented front-end architecture to support user interface concepts with 100% accuracy
- Monitored and improved front-end performance by 15% and documented application changes and worked on updates
- Developed the latest user-facing features using React.js and built reusable components and front-end libraries for future use
- Reviewed application requirements and interface designs to ensure compatibility with existing applications

OCT 2020 – TO DEC 2021
FRONTEND DEVELOPER, LEARNITNIGERIA LTD.

- Determined the structure and Design of web pages based on user requirements and balanced functional and aesthetic designs
- Created features to enhance the user experience while ensuring that the web design is optimized for smartphones

- Employed a variety of language and framework such as HTML,CSS and Material UI to write and create user-friendly web pages
- Built reusable code for future use and optimized web pages for 5 applications for maximum speed and scalability
- Managed brand consistency and enhanced the company's website by adding more features and functionality
- Liaised with cross-functional team to ensure that the client projects were completed on time within a stipulated budget
- Produced high-quality mockups and designed different prototypes and provided high-quality graphics and visual elements

EDUCATION

FEB 2016 – DEC 2018

HIGHER NATIONAL DIPLOMA IN COMPUTER SCIENCE, THE FEDERAL POLYTECHNIC BIDA

APR 2009

HIGHER EDUCATION, FEDERAL SCIENCE AND TECHNICAL COLLEGE KUTA

KEY SKILLS

- Application Designing
- Git
- UI Design
- Wireframe and Design Translation
- Debugging

- Application Performance Improvement,

- Webpage Optimization

- Project Delivery and Graphic Designing

TECHNICAL SKILLS

- **Languages:** JavaScript, CSS, HTML
- **Frontend Framework:** Bootstrap and Material UI
- **Backend Framework:** Node js (Integration)
- **Database:** MongoDb and Firebase
- **React tools**: React.js, React Native,Nextjs Webpack,, Redux-toolkit
- **Front-end Development Tools:** Babel, Webpack, Npm, Yarn

WORKED PROJECT

FastPass Application: a smart security app that will manage people visiting our homes, offices and other conveniences. FASTPASS app can be use in corporate offices, Estates, Hotels and individual buildings. I used React Native, Node js,Mongodb to develop the Android/IOS version of the Application.

ClaronDoc Application: An Application which can be used to book a doctor and communicate with the doctor via chat, audio or video call.
In which I used HTML , CSS , React js and Material Ui to create web page, There are two users of this application one is the user and the other one is the doctor; the user subscribe and book an appointment with the doctor. The doctor accept booking and call the patient via video call or chat

ShopNow Application: An Application which can be used to purchase items online. ,React Js for frontend development, and Node js for backend development. There are two users for the app one is the user and the other is the admin, the user visits the site and make orders using his/her browser the admin receive the orders in the admin dashboard.

Job Listening App Application: it's a job posting application that allow user to post jobs. ,React Js for frontend development, and Firebase for storing data.

HOBB

- Browsing Internet
- Watching Football (software language etc.)
